Index 127

PART ONE. ENROLLMENT

Part One contains the data which are the primary statistical concern of a registrar's office—the figures in regard to the total enrollment in the University and the enrollment in the several colleges, courses, and classes.

This information is given first in summarized form, by colleges, for each of the two years of the biennium; then in complete detail for each year; and finally in comparative form for the two years, by courses (Business, General Science, Architecture, etc.), and by classes (Seniors, Juniors, etc.).

Enrollment: Grand Total

It will be noted that the grand total for the second year of the biennium is smaller than the corresponding total for the first year. The difference represents approximately the loss in numbers sustained by the discontinuance of the College of Dentistry, which was closed on June 30, 1912, and not reopened during the following year. (Its reopening on October 1, 1913, was decided upon by the Board of Trustees on July 2, 1913.) The enrollment of the College of Dentistry in 1911-12 was 125; the difference between the grand totals for the two years is 113. The total enrollment for all departments exclusive of the College of Dentistry increased from 1911-12 to 1912-13 by 12 students.

Enrollment: Colleges

Altho the totals for the two years, exclusive of the College of Dentistry, are practically the same, there was considerable variation in the enrollment of the various colleges and schools—substantial gains in the College of Science (55 students) and the College of Agriculture (61 students), and small gains in most of the other departments, except the College of Engineering, which showed a loss of 130 students, and the School of Pharmacy, which fell off 22 students.

The details of these gains and losses may be exhibited as follows:

GAIN OR LOSS BY COLLEGES, 1911-12 to 1912-13

College or School	Gain	Loss
Literature and Arts	17	.....
Science	55	.....
Engineering	.....	130
Agriculture	61	.....
Music	6	.....
Law	4	.....
Library	.....	4
Graduate	10	.....
Summer Session (net)	10	.....
Medicine	14	.....
Dentistry	.....	125
Pharmacy	.....	22
Duplicate registration	.....	9
	177	290
		177
Net loss		113

Enrollment: Courses

When we come to compare the enrollment for the two years by courses (Table 5, page 18), several interesting points appear.

In the College of Literature and Arts there was a marked increase in the courses in Business and Household Science—in Business, 33 students; in Household Science, 28 students. On the other hand, the enrollment in the General Course in Literature and Arts fell off from 603 in 1911-12 to 559 in 1912-13—44 students, bringing the net gain for the College down to 17 students.

In the College of Science, however, the largest single gain was in the General Science Course—29 students. This figure was exactly equaled by the combined increase in the courses in Ceramics and Ceramic Engineering—15 students and 14 students respectively; total, 29. The courses in Chemistry and Chemical Engineering gained 8 students over the preceding year. The Household Science Course in this College had exactly the same enrollment for the two years. The Course Preparatory to Medicine showed a decrease the second year of 11 students.

The totals for the two colleges of Literature and Arts and Science, which by action of the Board of Trustees on July 5, 1912, constitute now the single College of Liberal Arts and Sciences, show an increase of 72 students, which is 5.5 per cent.

It will be noted that while the enrollment in the College of Engineering as a whole fell off, the course in Architecture gained approximately 5 per cent (to be exact, 5.7), and the courses in Architectural Engineering and Mining Engineering registered small increases—2 students and 3 students respectively.

The additional 61 students enrolled the second year in the College of Agriculture represent an increase of 7.4 per cent.

Of the three courses offered in Household Science, the one in the College of Agriculture lost 4 students and the one in the College of Science enrolled the same number both years, while the one in the College of Literature and Arts gained 28 students. The net gain in Household Science courses was 24 students, which is 10.3 per cent.

Enrollment: Men and Women

The relative number of men and women students remained practically unchanged. Of the total enrollment for 1911-12, 19.3 per cent were women; for 1912-13, 20.1 per cent. The statement which has appeared for many years in the Annual Register, that beginning with the year 1870-71, when women were first admitted to the University, they "have constituted from one-sixth to one-fifth of the total number of students," remains substantially correct.

The gain in the number of women students enrolled the second year of the biennium was 22. As noted above, there was an increase of 24 students in the Household Science Courses; the total number of women enrolled in courses other than those in Household Science actually fell off, therefore, by 2. The General Course in Literature and Arts lost 8

women as well as 36 men. In the General Science Course there was a gain of 4 women as well as of 25 men.

The following figures extracted from Table 5 (page 18) show the enrollment of women in vocational courses other than the courses in Household Science and courses in preparation for teaching (which by our organization are included under the general courses in Liberal Arts and Sciences).

ENROLLMENT OF WOMEN IN VOCATIONAL COURSES (OTHER THAN HOUSEHOLD SCIENCE AND EDUCATION)

	1911-12	1912-13
Business	3	5
Chemistry	0	1
Architecture	2	1
General Agriculture	8	13
Library	39	34
Medicine	37	35
Dentistry	5	----
Pharmacy	4	3
	98	92

If allowance be made for the 5 women enrolled in the College of Dentistry in 1911-12, for whom we have no corresponding figures in 1912-13 on account of the closing of that College, these two totals are almost identical—93, for 1911-12; 92, for 1912-13.

"Percentage of Loss"

Tables 7 and 8 attempt to indicate the extent to which the undergraduate student body consisted of the same individuals during the two years of the biennium and to what extent it was a changing body.

It will be seen (Table 8, page 22) that of the number of undergraduate students (including law students) enrolled in 1911-12, 14.4 per cent were graduated in June, 1912, and 56.2 per cent were continuing their studies on November 30, 1912. This leaves 29.4 per cent who are unaccounted for. They were not graduated; they did not return. For one reason or another they "dropped out."

The complementary figures for the student body of the fall of 1912-13 are shown in Table 7 (page 21): former students, 58.2 per cent; new students, 41.8 per cent.

The interest in this matter centers, of course, in the group of students who failed to return—the "percentage of loss," as it is sometimes called. It will be noted that this varied considerably in the several colleges. It is perhaps natural that it should be highest in the School of Music—40.2 per cent. The College of Engineering is next—33.7 per cent; with the College of Agriculture a close third—32.5 per cent. Then come, at considerable intervals, Literature and Arts, with 26.9 per cent, and Science, with 18.6 per cent; while the College of Law has the notably low loss of 9.9 per cent.

Growth of the University, 1868-1913

Finally come two tables (Nos. 9 and 10, pages 24 and 26) which summarize the increase in the number of students in the University from its opening in the spring of 1868 through the year 1912-13—forty-six years.

For its short spring term in 1868 the Illinois Industrial University enrolled 77 men. The total for the first full school year, 1868-69, was 128. This number increased rapidly till it reached in 1873-74 a grand total of 406. Women students, first admitted in 1870-71, numbered 24 in that year, 53 in 1871-72, 74 in 1872-73, and 90 in 1873-74.

The next year, 1874-75, the total dropped back to 373; from which it worked up again rather slowly to 434 in 1879-80. In this year the number of women for the first time exceeded 100, reaching the total of 112, which was not equaled again for fifteen years—until 1894-95.

In 1880-81, the enrollment again decreased, to 379, and it was a full decade—in 1889-90—before it again reached (and passed) the figure for 1879-80.

In 1890-91, the 500 mark was passed. In the next two decades the enrollment increased approximately 900 per cent—from 519 in 1890-91 to 5217 in 1910-11. A part of this gain in numbers was due to the organization or annexation of new departments—in 1894, the Summer Session; in 1896, the School of Pharmacy; in 1897, no less than four new colleges and schools: the School of Music, the Library School, the College of Law, and the College of Medicine; in 1900, the Courses in Business Administration; and in 1901, the College of Dentistry; but the major part of it was the result of the growth in the four undergraduate colleges at Urbana. In 1910-11, of the total enrollment of 5217, 3196 were registered in the four undergraduate colleges, which were differentiated as far back as 1870; all the departments added or differentiated at a later date, including the School of Music, the College of Law, the Library School, the Graduate School, the Summer Session, the Academy, and the Chicago departments, numbering 2021.

The highest grand total so far recorded was reached in 1910-11—5217 students. In June, 1911, the Academy was discontinued. This department then numbered 304 students, and this loss in the count brought the total for 1911-12 down to 5200, altho there was a gain in that year of 287 collegiate students. As explained above, the still lower figure for 1912-13 represents substantially the loss in numbers sustained by the closing for the year of the College of Dentistry.

The details of the growth of the University by colleges and schools from 1889-90 to date may be seen in Table 10 (page 26) or more casually in Figure 5 (page 32).

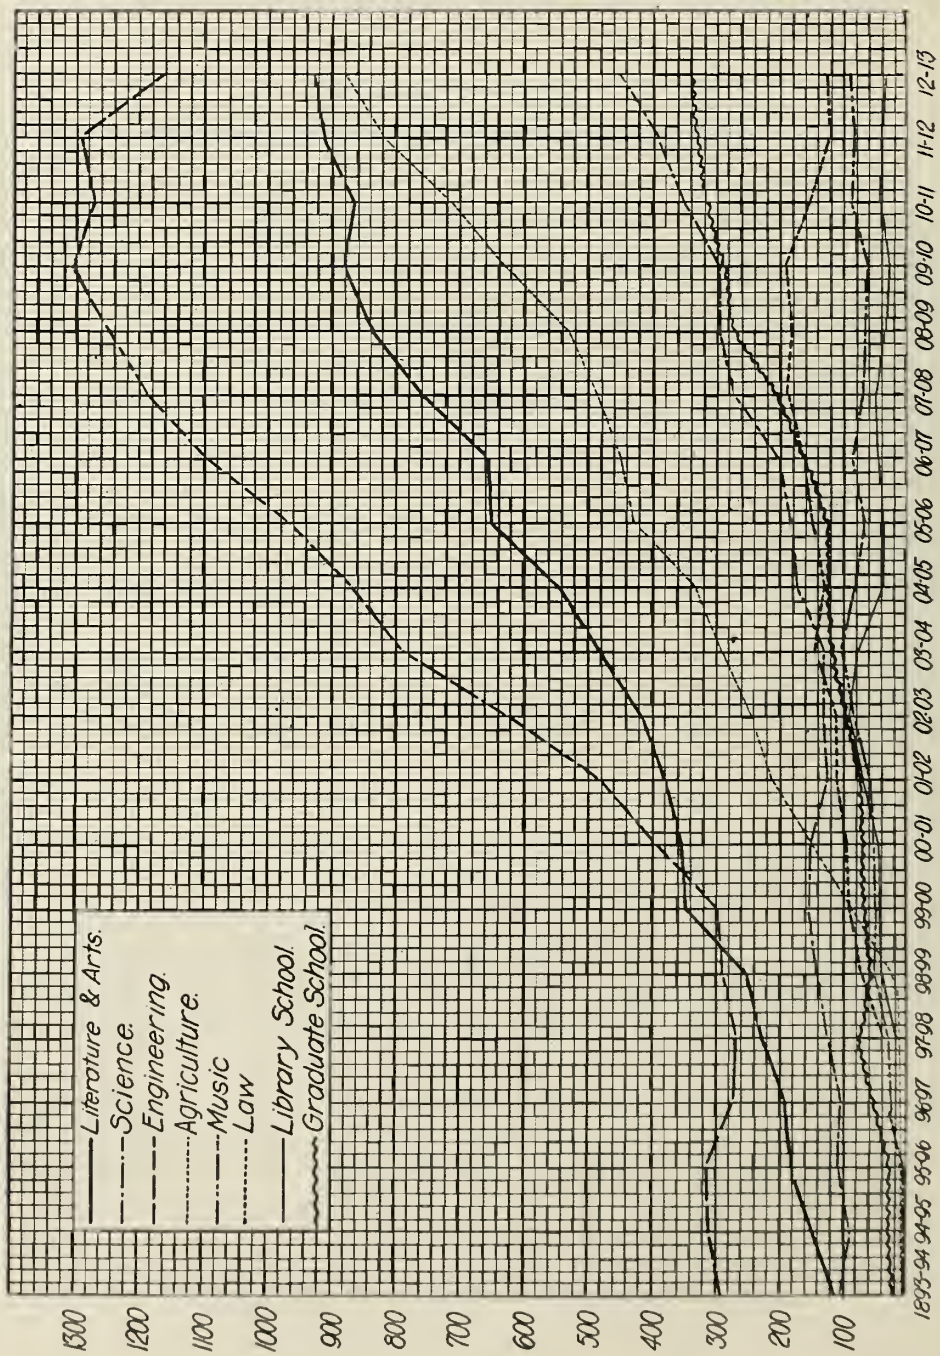
FIGURE 5

ENROLLMENT BY COLLEGES, 1893-1913



PART TWO. THE COMPOSITION OF THE STUDENT BODY

Part Two presents data relating to the composition of the student body, derived from the answers given by the students themselves to questions printed on the registration blanks; it indicates, broadly at least, the sources of our constituency—the territories, geographical, scholastic, economic, and religious, from which our students are drawn.

Geographical Distribution

Tables 11 and 12 (pages 41 and 48) show first of all that, roughly speaking, four thousand out of our five thousand students come from the State of Illinois (3936 out of 5200 in 1911-12; 3817 out of 5087 in 1912-13).

Only one county in the State—Calhoun (in the southwest above St. Louis, the county containing no railroad)—failed of representation in the University during the biennium. Three counties in the extreme south—Hamilton, Hardin, and Pope—were represented in only one of the two years.

Cook County, of course, sent a larger number of students than any other one division of the State—approximately a thousand students each year (1047 in 1911-12; 966 in 1912-13).

Champaign County followed with 689 in 1911-12 and 613 in 1912-13. It should be noted, however, that the numbers for Champaign County are swelled by students whose parents have moved to this county temporarily from other parts of the State for the purpose of enabling their children to live at home while attending the University.

Eighteen counties besides Cook and Champaign sent 40 or more than 40 students to the University in one or the other year or both years of the biennium:

COUNTIES SENDING FORTY OR MORE STUDENTS

	1911-12	1912-13
Adams	38	46
Bureau	31	44
Edgar	43	35
Fulton	35	57
Iroquois	46	42
Kane	106	105
LaSalle	81	87
McLean	56	56
Madison	40	36
Peoria	72	65
Rock Island	42	42
St. Clair	41	39
Sangamon	70	70
Tazewell	42	37
Vermilion	61	74
Whiteside	36	42
Will	64	41
Winnebago	35	44

Exactly one-half the counties (51) sent 20 or more students to the University, and approximately four-fifths of the counties (79) sent 10 or more students, in one or the other year or both years.

The number of students from Illinois outside of the counties of Cook and Champaign was, in 1911-12, 2200; in 1912-13, 2238. The following tables show the distribution of these students north and south and east and west in the State.

GEOGRAPHICAL DISTRIBUTION IN ILLINOIS, NORTH AND SOUTH

	1911-12	1912-13
Students from counties (other than Cook and Champaign) lying north of a line drawn east and west through Springfield	1416	1430
Students from counties which would be cut by such a line	254	232
Students from counties lying south of such a line	530	576

GEOGRAPHICAL DISTRIBUTION IN ILLINOIS, EAST AND WEST

	1911-12	1912-13
Students from counties (other than Cook and Champaign) lying east of a line drawn north and south through Bloomington	846	789
Students from counties which would be cut by such a line	382	425
Students from counties lying west of such a line	972	1024

States other than Illinois sent us approximately 1100 students in each of the years in question (1112 in 1911-12; 1110 in 1912-13). All the states except Delaware and Maine were represented in 1911-12, and all except Delaware and North Carolina in 1912-13. The adjoining commonwealths of Indiana, Iowa, Missouri, and Wisconsin naturally contributed the largest numbers.

From the Insular Possessions of the United States we drew 14 students in 1911-12 and 17 in 1912-13.

From foreign lands we had in 1911-12, 138 students; in 1912-13, 143. Thirty-six countries were represented in one or the other year or both years.

Five foreign countries had 10 or more students in residence in one year or both years:

	1911-12	1912-13
China	50	46
Japan	19	16
Mexico	13	11
Canada	10	13
India	5	10

Schools from Which Intrants Were Received

In studying the composition of the student body the question which arises next after that of geographical distribution naturally relates to the schools from which the students have come. Tables 13 and 14 (pages 56 and 63) answer this question with reference to the new students received as undergraduates in regular standing during the biennium. The phrase "in regular standing" is here used to indicate both "matriculated" students—those who have satisfied the entrance requirements in full, including all prescribed subjects—and "conditioned freshmen"—students admitted with deficiencies of not to exceed two units to be removed within their first year of residence. It excludes "special students"—those admitted, without having satisfied the regular entrance requirements, on the ground of maturity and special preparation in particular subjects which they are permitted to pursue.

The large facts in this matter may be seen at a glance in the three-line summaries at the beginning of the two tables (at the top of pages 56 and 63). More briefly still: the total number of intrants as undergraduates in regular standing during the two years was 2543; of whom 1885 came from public high schools, 231 from other secondary schools, 63 from normal schools, and 364 from other colleges and universities; 1822 came from Illinois schools, 721 from the schools of other states or foreign countries.

A complete list of the accredited public high schools of Illinois is included in each table, so that the schools which sent no new students in either year are shown as well as those that did send new students.

Thirty-five Illinois high schools sent 10 or more new students to the University during the biennium: Urbana, 87; Champaign, 81; Lane (Chicago), 42; Crane (Chicago), 41; Springfield, 31; Oak Park and River Forest Township (Oak Park), 29; Hyde Park (Chicago) and Rockford, each 26; Joliet Township, 25; Englewood (Chicago), 23; Elgin, 20; Decatur, 19; Moline and Quincy, each 18; Danville and Freeport, each 17; LaSalle-Peru Township (LaSalle), 16; Lyons Township (LaGrange) and Wendell Phillips (Chicago), each 15; Canton, 14; East Aurora and Mattoon, each 13; Clinton and Lake View (Chicago), each 12; Alton, Austin (Chicago), Bowen (Chicago), East St. Louis, Lake (Chicago), Sterling Township, and Thornton Township (Harvey), each 11; and Bloomington, Calumet (Chicago), Paris, and Streator Township, each 10.

A general summary of the representation of the Illinois high schools follows:

NEW INTRANTS IN REGULAR STANDING FROM ILLINOIS HIGH SCHOOLS

	1911-12	1912-13
High schools not represented	96	83
High schools which sent 1 student	66	56
High schools which sent 2-4 students	92	106
High schools which sent 5-9 students	27	27
High schools which sent 10 or more students (in one year)	10	18
Total, accredited high schools	291	290

The representation of other Illinois schools may be summarized as follows:

NEW INTRANTS AS UNDERGRADUATES IN REGULAR STANDING FROM OTHER ILLINOIS SCHOOLS

	Schools Represented		Students	
	1911-12	1912-13	1911-12	1912-13
Private secondary schools	16	24	97	74
Normal schools	6	5	28	18
Colleges and universities	13	17	54	47
Totals	35	46	179	139

The representation of schools in states other than Illinois and in foreign countries is exhibited in the following summaries:

NEW INTRANTS AS UNDERGRADUATES IN REGULAR STANDING FROM STATES OTHER THAN ILLINOIS

	States Represented		Schools Represented		Students	
	1911-12	1912-13	1911-12	1912-13	1911-12	1912-13
Public high schools	31	26	128	131	192	187
Private secondary schools	13	14	24	21	29	23
Normal schools	6	7	6	7	8	8
Colleges and universities	24	30	64	70	114	123
Totals			222	229	343	341

NEW INTRANTS AS UNDERGRADUATES IN REGULAR STANDING FROM FOREIGN COUNTRIES

Parentage of Degrees

Tables 15 and 16 (pages 71 and 74) show the parentage of the degrees which were held by students registered during the two years. The important part of each of these tables is, of course, that which shows the parentage of degrees held by the students registered in the Graduate School. This part of these tables is virtually a continuation for the Graduate School of Tables 13 and 14, "Schools from which Intrants (Undergraduates in Regular Standing) Were Received".

The part of these tables relating to the Graduate School may be summarized, to show the representation of the several classes of institutions, as follows. (Where a student holds two degrees, both are counted in the columns headed "No. of Degrees"; hence the totals of these columns are considerably larger than the number of graduate students. Seventy-one out of 329 graduate students in 1911-12, and 105 out of 339 students in 1912-13, held more than one degree.)

REPRESENTATION OF DIFFERENT CLASSES OF INSTITUTIONS

	No. of Institutions Represented		No. of Degrees	
	1911-12	1912-13	1911-12	1912-13
University of Illinois	1	1	173	193
Other state universities	17	14	52	52
State colleges of agriculture and mechanic arts	8	10	11	13
Larger endowed universities	8	14	36	43
Small colleges, Illinois	19	17	45	44
Small colleges, other states	47	59	74	94
Foreign institutions	7	5	9	5
Totals	107	120	400	444

The various kinds of degrees held by registrants in the Graduate School during the biennium are shown in the following table (the duplication, with respect to students, being the same as in the preceding summary):

KINDS OF DEGREES HELD

Degree	1911-12	1912-13
Bachelor of Arts	182	182
Bachelor of Philosophy	8	8
Bachelor of Science	140	146
Bachelor of Civil Engineering	1	1
Bachelor of Commerce	1	0
Bachelor of Divinity	1	1
Bachelor of Library Science	2	2
Bachelor of Laws	0	2
Master of Arts	41	59
Master of Philosophy	0	1
Master of Science	13	29
Doctor of Law (J.D.)	1	1
Architectural Engineer	1	1
Civil Engineer	1	2
Electrical Engineer	1	2
Mechanical Engineer	3	4
Doctor of Philosophy	1	1
*Graduate of a higher institution which gives no degree	2	2
†Graduate in Pharmacy	1	0
Totals	400	444

The third page of each of these tables (pages 73 and 76) shows the parentage of degrees held by students in (1) the undergraduate and professional departments at Urbana and (2) the College of Medicine (Chicago).

In 1911-12, out of 3654 students enrolled as undergraduates or in Law or Library Science at Urbana, 43 already held degrees; 4 of these students already held two degrees. Sixteen institutions besides the University of Illinois were represented.

In the second year of the biennium, the corresponding enrollment total was 3663, and this figure included 74 students who held degrees, 9 of whom held two degrees. The representation of institutions other than the University of Illinois was 29.

Of 537 students enrolled in the College of Medicine in 1911-12, 33 were college graduates, and 3 held two degrees. Twenty-six institutions were represented.

In 1912-13 the College of Medicine enrolled 551 students. Of these 24 were college graduates, and 3 held two degrees. The institutions represented numbered 20.

Occupations of Parents and Guardians

Table 17 (page 78) summarizes the statements made by the students in the undergraduate and professional colleges and schools at Urbana in 1912-13 in answer to the following query printed on the registration

*The institutions represented in these four cases are Concordia College, the United States Naval Academy, Tangshan College, and the Tokyo Higher Technical School.

†The Graduate in Pharmacy held also the degree of Bachelor of Science.

blanks: "Occupation of parent or guardian?" It serves to indicate, broadly at least, the extent to which each of the economic classes in the community contributes to our student body.

It will be noted that this table and the two tables which follow (dealing with "Religious Affiliations" and the "Ages of Students") cover only the second year of the biennium. It was felt that there was no particular point in making up data of this sort for every successive year. If such statistics be made available for every third year, for example, any significant variations will probably appear with sufficient clearness.

Considerable difficulty was experienced in making a satisfactory classification of the varied occupations, and the grouping here given is undoubtedly open to question at several points. All that is claimed for it is that it seemed on the whole distinctly better than a number of other classifications which were tried.

A further weakness in this tabulation arises from the indefiniteness of many students' replies relative in this matter. Eighty-five students, for example, described their fathers as "manufacturers", without further specification; 233 wrote merely "merchant"; 13, "manager"; and so on.

With all these defects, however, this table exhibits unmistakably the highly democratic character of our undergraduate population. Seventy-six students are sons or daughters of bankers, but 92 are the children of unskilled laborers, and 244 are from the families of skilled laborers (barbers, blacksmiths, carpenters, miners, tailors, tinners, etc.). The representation from what have been called the "artistic professions" (architecture, art, literature, music) happens to be exactly the same as that from the grocery business—41 students in each case; while the total for "mercantile business", which is really comparable with the total for the "artistic professions", is 680. Or take the business of railroading: we have several high officials represented—one president, one chief engineer, one division engineer; we have also 90 young men and women whose fathers are conductors, locomotive engineers, and station agents, or belong to similar divisions of the service.

Five more or less distinct occupational groups sent us 200 students or more in 1912-13:

Agriculture	909
"Mercantile business"	680
The professions	449
"Financial and semi-legal business" (bankers, brokers, real estate dealers, etc.)	251
Skilled labor	244

Religious Affiliations

Table 18 (page 85) briefly summarizes the answers given by the students in the undergraduate and professional colleges and schools at Urbana in 1912-13 to the question on the registration blanks as to their religious affiliations.

It is to be noted that the students are in no sense required to answer this question. The Registrar's clerks see to it that all the other blanks

are filled, but take no notice of omissions on this point. This accounts for the considerable number of students (410) from whom we had no expression as to their affiliation or lack of affiliation.

The number of shades of religious belief represented is 41.

The student body is apparently overwhelmingly "orthodox". One student described himself as an agnostic; 3 are liberalists; 2 wrote "undenominational"; and 117 stated explicitly that they had no religious affiliations. There are 64 Unitarians and 38 Universalists. There are, also, 1 Confucianist, 6 followers of Hinduism, and 47 Jews. With all these deductions—made for widely varying reasons as they are,—we have 3001 students, out of 3253 who answered on this point, who belong to what are commonly known as "orthodox" denominations of the Christian faith.

Eight denominations were represented, in 1912-13, by more than one hundred students:

Methodist	907
Presbyterian	617
Congregationalist	264
Christian	239
Baptist	228
Roman Catholic	214
Episcopalian	195
Lutheran	105

Ages of Students

The last table in Part II (No. 19, page 86) relates to the ages of the students in the departments at Urbana for 1912-13, taken as of September 1, 1912. First are shown the average ages, by colleges and schools, by classes, and by sexes; second, the distribution of ages, by classes and sexes.

The average age of all the students registered at Urbana during 1912-13, taken as of September 1, 1912, was 22.02 years.

Both in the institution as a whole and in the undergraduate colleges, the average age of the women students was higher by nearly one year than the average age of the men:

Entire University—average age, men, 21.84; women, 22.70.
Undergraduates—average age, men, 21.20; women, 22.18.

The reverse is true, however, for the Graduate School, in which the men averaged 28.00 years, and the women 27.48 years.

It is natural, perhaps, that the averages for the students in the College of Literature and Arts should run somewhat lower than the averages for the other undergraduate colleges. The lowest average shown is that for the freshmen men in the College of Literature and Arts—18.66 years. Next comes the College of Engineering, with 21.31 years; third, the College of Science, with 21.53 years; fourth, the College of Agriculture, with 21.93 years; fifth and sixth, but almost together, the School of Music and the College of Law, with 22.42 years and 22.49 years respectively; and seventh, the Graduate School, with 27.90 years; while the Library School has the highest average age, 28.05 years.

The latter part of the table shows the distribution of ages—counted as insurance companies do by the nearest birthday.

We had, in 1912-13, 18 students of sixteen years of age—the lowest age at which candidates may be admitted, and one student fifty years of age.

The distribution between these extremes may be summarized as follows:

No. of students in their teens	1119
No. of students in their twenties	2449
No. of students in their thirties	84
No. of students in their forties	10
No. of students 50 years of age	1
Total	3663

PART THREE. DEGREES

Part Three shows the number and kinds of degrees conferred during the biennium and the geographical distribution of the recipients of these degrees.

Degrees Conferred, 1912, 1913

Tables 20 and 21 (pages 93 and 94) are summaries of the degrees given at the Forty-first Annual Commencement, June 12, 1912, and the Forty-second Annual Commencement, June 11, 1913.

The University at the present time offers courses leading to 18 different degrees: 3 baccalaureate degrees, strictly so-called, A.B., B.S. (in liberal arts, in engineering, and in agriculture), and B.Mus.; 2 degrees in law, LL.B. and J.D.; the degree in library science, B.L.S.; 4 degrees in medicine, dentistry, and pharmacy, M.D., D.D.S., Ph.G., and Ph.C.; and 8 graduate degrees—3 master's degrees, A.M., M.S., and M.Arch.; 4 professional second degrees in engineering, A.E., C.E., E.E., and M.E.; and the doctorate, Ph.D. All of these degrees were conferred during the biennium except the M.Arch. and the A.E.

The College of Dentistry having been closed June 30, 1912, and not reopened until October, 1913, no degrees in dentistry were given in 1913.

From 1876 to 1895 the degree of Bachelor of Literature (B.L.) was regularly given to students who completed a course in liberal arts which did not include Greek. In 1913 it was conferred again, for the first time since 1895, upon a student of the class of 1885 who completed the last required course a few days after the commencement of her senior year and had never actually taken her degree.

Besides the degrees in course, the degree of Doctor of Laws, *honoris causa,* was conferred in 1912 upon Dr. Thomas Jonathan Burrill, Emeritus Professor of Botany and late Vice-President of the University, and Dr. Samuel Walker Shattuck, Emeritus Professor of Mathematics and late Comptroller.

The graduating class of 1913 was smaller by 16 students than the class of 1912. This falling off was due to the dropping out of the College of Dentistry, which had 36 graduates in 1912, and to the smaller number of degrees in medicine—130 in 1913 as against 145 in 1912. There was an increase of 38 in the number of graduates in the colleges and schools at Urbana—5.9 per cent.

Looking at individual departments, we find that the largest increase was in the College of Agriculture, which graduated 27 more students in 1913 than in 1912—a jump of 39.7 per cent. The next largest gain was in the number of master's degrees; the number conferred in 1913 was larger by 22 than the number in 1912. The percentage in this case is 25.8. In

percentage increase, however, no other department can compare with the School of Music, which had 7 graduates in 1913 against 2 in 1912—a gain of 250 per cent! The only large falling off at Urbana was in the College of Engineering, which recommended 16 fewer students for its degree in the second year of the biennium than in the first year—a loss of 8.2 per cent. The number of A.B. degrees conferred in 1913 was less by 5 than the number for 1912. The number of doctorates was exactly the same for the two years (20); likewise the number of degrees in law (26); and there was a variation of one only in the number of pharmaceutical degrees—37 in 1912, 36 in 1913.

Geographical Distribution of Degrees

Of the degrees granted by the University in the departments at Urbana during the biennium, 1005 were conferred upon citizens of Illinois (see tables 22 and 23, pages 95 and 100).

Eighty-nine out of the 102 counties of the State—all but 13 counties—were represented *by graduates* during the two years; 73 counties were represented in 1912, 78 in 1913, 62 in both years.

The following counties—23 in number—had 10 or more citizens in the graduating classes of the two years:

Adams	11	McDonough	12
Champaign	209	McHenry	10
Christian	10	McLean	22
Cook	199	Macon	10
Edgar	11	Madison	11
Hancock	10	Peoria	19
Iroquois	16	St. Clair	14
Kane	29	Sangamon	19
Knox	10	Tazewell	14
LaSalle	22	Vermilion	23
Lee	11	Whiteside	12
Livingston	11		

Twenty-eight states other than Illinois were represented in the graduating class of each of the two years under consideration—in most cases by only one, two, or three students. Twenty states were represented in both years, while in each class there were students from 8 states not represented in the other class; the total number of states other than Illinois represented during the biennium was therefore 36. Indiana had, in both years, nearly twice as many recipients of degrees as any other one state besides Illinois—23 graduates in each year. In 1912, Iowa, with 13, was the only other state to have as many as 10 graduates. In 1913, Iowa had 14, Wisconsin 12, and Missouri and Ohio each 10

Four students from the Insular Possessions of the United States received degrees during the biennium—2 Filipinos and 2 Porto Ricans.

The two graduating classes contained 50 foreign students, nearly half of them (21) from China—chiefly, of course, students sent to America by the Chinese government out of the Indemnity fund. The remaining 29 foreign graduates were distributed as follows: from Japan, 10; from Canada, 5; from India and Mexico, 3 each; from Cuba and Norway, 2 each; from Argentina, Italy, South Africa, and Uruguay, 1 each.

PART FOUR. THE FACULTY

Part Four contains summaries of the membership of the University faculty for the two years of the biennium. There is added a table showing the total number in the faculty for each year of the University's history, 1868-1913.

Number in the Faculty, 1911-12, 1912-13

Tables 25 and 26 (pages 110-111) show the number in the faculty for each year, distributed by colleges and schools, by ranks, and by sexes.

In tables 27 and 28 (pages 112-113 and 114-115), the same figures are further analyzed, for the undergraduate colleges at Urbana, by departments.

It should perhaps be noted that no undergraduate student assistants are counted in these tabulations.

The total membership of the faculty in the second year of the biennium (587) was larger than the total membership for the first year (583) by only 4 persons.

The smallness of this difference results from the dropping out for the second year of the College of Dentistry, which had in 1911-12 a faculty of 21; and from a decrease in the size of the faculty of the College of Medicine, which numbered but 133 in 1912-13 as against 144 in 1911-12. The faculty of the School of Pharmacy remained the same for the two years (8).

The number of teachers in the departments at Urbana increased from 410 in 1911-12 to 446 in 1912-13—8.7 per cent.

The greater part of this increase is found, naturally, in those colleges which experienced the largest growth in number of students during the same period, namely, the College of Agriculture, which added 17 teachers for 1912-13, and the College of Science, which added 10 teachers. (For the parallel figures concerning the increase in the number of students by colleges, see Part One, page 7.)

The College of Literature and Arts had 1 more teacher in the second year of the biennium than in the first year; the College of Engineering 3 more teachers; the Library School 4 more (3 of them, however, special lecturers, giving only a limited amount of instruction); and the department of physical training 2 more. No increases were made in the staff of the School of Music or in the department of military science; and the College of Law had only 7 teachers in 1912-13 as against 8 in 1911-12.

Further comparisons, by departments, may be made from Tables 27 and 28 (pages 112-113 and 114-115). It will be seen that the variations from the one year to the other are in the main small. The following departments had an increase of 3 or more in their staffs for the second year:

	1911-12	1912-13
English	28	31
Botany	12	15
Chemistry	43	49
Zoology	13	16
Animal husbandry	10	18
Horticulture	9	14

Using the figures for 1912-13, the thirty-eight departments comprized in the four undergraduate colleges at Urbana may be summarized according to size of staff as follows:

No. of departments with 1- 5 teachers	15
No. of departments with 6-10 teachers	8
No. of departments with 11-15 teachers	8
No. of departments with more than 15 teachers	7
	38

The seven departments which, in 1912-13, had more than 15 teachers were: chemistry, 49; English, 31; mathematics and mechanical engineering, each 21; animal husbandry, 18; zoology and agronomy, each 16. The eight departments which, in the same year, had from 11 to 15 teachers were: botany, 15; horticulture, 14; physics, 13; Germanic languages and architecture, each 12; economics, dairy husbandry, and household science, each 11. The departments of history, civil engineering, electrical engineering, and theoretical and applied mechanics numbered 10 each in their staffs (1912-13).

The distribution of the membership of the faculty by ranks may be summarized as follows, using the figures for 1912-13 (from Table 26, pages 110-111).

DISTRIBUTION OF FACULTY BY RANKS, 1912-13

	DEPARTMENTS AT URBANA	DEPARTMENTS IN CHICAGO	ALL DEPARTMENTS
Professors	71	42	113
Associate professors	10	11	21
Assistant professors	60	20	80
Associates	39	—	39
Instructors	119	58	177
Assistants	105	9	114
Graduate assistants	25	—	25
Special lecturers	17	1	18
Totals	446	141	587

From the foregoing table it appears that 15.9 per cent of the teaching staff at Urbana held (in 1912-13) the rank of professor; 13.4 per cent that of assistant professor; 26.6 per cent, instructor; 23.5 per cent, assistant; 20.4 per cent, other ranks.

The first four ranks, professor, associate professor, assistant professor, and associate, which are commonly thought of as constituting the permanent faculty (although associates are appointed for two years only, and most assistant professors for limited terms of two, three, or five years), numbered, in the departments at Urbana, in 1912-13, 150 out of 446—33.6 per cent.

No associates have been appointed in the departments in Chicago. The three professorial ranks in these departments in 1912-13 numbered 72 out of 141—51.0 per cent.

The number of women in the faculty remained practically the same during the biennium:

1911-12: 54 at Urbana, 12 in Chicago—total, 66
1912-13: 57 at Urbana, 10 in Chicago—total, 67

The following figures, extracted from Tables 25-28 (pages 110-115), show the distribution of the women members of the faculty by departments:

WOMEN MEMBERS OF FACULTY BY DEPARTMENTS

	1911-12	1912-13
Art and design	2	2
English	9	6
Germanic languages	1	1
Romance languages	1	—
History	1	1
Philosophy	—	1
Botany	4	3
Zoology	3	5
Chemistry	2	1
Total, Arts and Sciences	23	20
Agricultural extension	—	1
Household science	9	11
Music	5	4
Library science	13	16
Physical training	4	5
Medicine	12	10
Totals	66	67

The 54 women teachers at Urbana in 1911-12 included 2 of professorial rank, 4 assistant professors, and 3 associates; and the corresponding number of women for 1912-13, 57, included 2 of professorial rank, 2 assistant professors, and 2 associates; the remaining women teachers in both years belonging to the ranks in which the appointments are annual. In the College of Medicine the number of women in the higher ranks was relatively larger in both years; 3 professors, 1 associate professor, and 2 assistant professors out of 12 women teachers in 1911-12; and 3 professors and 2 assistant professors out of 10 women in 1912-13.

Number in the Faculty, 1868-1913

Table 29 (page 116), which gives the total membership of the faculty for each year since the opening of the University in 1868, is reprinted from President James's Biennial Report of the University in the *Illinois School Report* for 1908-1910 (page 564).

This table should be studied together with Table 9 (page 24), which shows the total enrollment of students year by year from 1868 to 1913. See also the discussion of Table 9 on page 10.

For the instruction of its 77 students during the short spring term of 1868 the Illinois Industrial University provided 4 teachers, including, of course, the Regent, who was Professor of Philosophy.

For the first full school year, 1868-69, there were 11 teachers for 128 students; for the second full year, 19 teachers for 180 students. The same number of instructors, 19, taught the 278 students of 1870-71; but 5 more, making a faculty of 24, were added for 1871-72. This addition was timely, since the student enrollment jumped from 278 in 1870-71 to 381 in 1871-72. Thus in the first five years of the University's history the faculty increased in size by 500 per cent.

The number of teachers was, however, to remain in the twenties or lower thirties for nearly two decades. In 1889-90 there were still only 32 in the University faculty, with a student body of 469.

But about the middle of the eighties a rapid growth in numbers began. In 1885-86 there were only 332 students enrolled in the newly christened University of Illinois*—nearly 50 students fewer than in 1871-72 (381); and the faculty numbered only 29—less by 1 than the number for 1874-75. But every year of the decade which began in 1886-87 marked a substantial gain in the number of students, which in 1895-96 reached 855. During the first half of this decade the increasing number of students does not seem to have affected the size of the faculty. In 1889-90, the number of teachers (32) had increased but 3 over the number in the faculty five years before, altho the student body was larger by 41.2 per cent. But for 1890-91 7 additional instructors were employed, and the growth of the faculty from this point on was rapid. By 1895-96 the number of teachers was 84.

Then came the annexations of 1896 and 1897—the School of Pharmacy, the Library School, and the College of Medicine,—with the establishment of the School of Music and the College of Law. From 1895-96 to 1897-98 the student body increased from 855 to 1582 and the faculty from 84 to 184.

The growth of the faculty from 1897-98 to date has been relatively steady; the larger gains coming, for obvious reasons, in alternate years—the years immediately following the biennial sessions of the General Assembly.

The two largest gains for single years occurred in 1901-02 and 1905-06—gains of 55 and 58 teachers respectively.

*The act providing for the change of name was approved June 19, 1885.

PART FIVE. COURSES OFFERED

Part Five contains tabulations showing the number of courses offered in the colleges and schools at Urbana during the biennium.

Courses Offered, 1911-12, 1912-13

Tables 30 and 31 (pages 120 and 122) summarize the courses of instruction which are listed in the "General Description of Courses" in the *Annual Registers* of 1911-12 and 1912-13 as having been offered in those years.

It should be noted that courses listed in the two *Registers* but marked "Not given in"—the year in question, are not counted in these tables, which are designed to show only courses actually taught. Perhaps it should be added that the courses so designated do not by any means represent obsolete material or mere "paper" announcements. They are in most cases advanced courses which are regularly given in alternate years or once in three years, in accordance with departmental schedules carefully planned to insure that every student likely to be interested shall have an opportunity to get the work at a suitable point in his course. The number of such courses listed in the *Register* for 1911-12 was 69 (44 open to undergraduate students, 25 for graduates only). The corresponding number for 1912-13 was 73 (41 open to undergraduates, 32 for graduates alone).

Attention should also be called emphatically to the fact that these figures do not afford a basis for a comparison of the "amounts of instruction" given by the several departments, for the reason that each course listed in the *Register* is counted simply as one course, without discrimination as to whether it was a one-hour course (meeting only once a week for a semester of eighteen weeks) or a two-hour, or three-hour, or four-hour, or five-hour course (meeting two, or three, or four, or five times a week for the same period); and without discrimination also between one-semester and two-semester courses.

These tables serve, however, to indicate, more or less imperfectly, the *scope* of the work of the several departments and colleges and of the institution as a whole, and it is hoped that this point may be of interest.

The total number of courses offered in the departments at Urbana in 1911-12 was 959; in 1912-13, 981.

Of the 959 courses given in 1911-12, 759 were open to undergraduates, while 200 were courses for graduate students only. In 1912-13, the courses for undergraduates numbered 775 out of 981, the graduate courses 206.

As will be evident from the small difference in the grand totals, there was but slight variation in the number of courses offered by single departments from one year of the biennium to the other—in most cases a matter of one or two courses only. The following departments offered as many as 5 courses more in 1912-13 than in 1911-12.

	1911-12	1912-13
English	46	51
Political science	16	21
Physics	19	26
Chemistry	60	71

Music is credited with 37 courses in 1912-13 as against 27 in 1911-12; but this increase in offerings is apparent rather than real, resulting from the fact that certain work which had been given for some years was in 1912-13 differentiated into a larger number of courses for purposes of more accurate record.

The number of courses offered in liberal arts and sciences (among which physics, altho administered by the College of Engineering, is here included) increased from 540 in 1911-12 to 565 in 1912-13. On the other hand, there was a slight decrease from the first to the second year of the biennium in the number of courses offered in engineering subjects—192 in 1911-12, 184 in 1912-13; and likewise in agricultural subjects—115 in 1911-12, 110 in 1912-13.

The following figures, extracted from Tables 30 and 31 (pages 120-122), show the distribution of the courses in liberal arts and sciences among the several subject groups:

	1911-12	1912-13
Art and design	13	13
Language and literature (classics, Romance languages, Germanic languages, English)	145	149
Political and social sciences (history, economics, political science, sociology)	96	101
Philosophical subjects (philosophy, psychology, education)	42	40
Mathematics	34	31
Physical sciences (astronomy, geology, physics, chemistry)	118	139
Biological sciences (zoology, botany, entomology, physiology)	73	73
Ceramics	19	19
Totals	540	565

Courses Offered, Summer Sessions of 1912, 1913

Tables 32 and 33 (pages 124 and 125) show the number of courses offered by the several departments in the two Summer Sessions of the biennium.

The total number of courses offered in the summer of 1912 was 139; in the summer of 1913, 167.

Of the 139 courses of 1912, 117 were offered for undergraduate credit only; 14, while listed as advanced undergraduate courses, were open to graduate students also for credit; and 8 were for graduates only.

In 1913, 135 out of the 167 courses were exclusively undergraduate, 24 were open to both advanced undergraduates and graduates, and 8 required graduate status for admission.

There was thus an increase for the second summer of 28 in the number of undergraduate courses, and an increase of 10 in the number of courses offered for graduate credit.

The number of departments represented in the Summer Session was the same for both years—26; and the departments themselves were the same, except that geology, which was represented in 1912 by two courses in physiography, offered no work in 1913, and household science, which was not able to give summer work in 1912 because of changes being made in the quarters of the department (incident to the erection of the addition to the Woman's Building), offered 5 courses in 1913.

In the main, of course, the offerings of individual departments show little variation from the one year to the other. The notable increases for the second year were in education and psychology (grouped together as one department for their summer work)—11 courses in 1912, 18 in 1913; and in chemistry—17 courses in 1912, 24 in 1913. Physical training, which offered 5 courses in 1912, offered 1 only in 1913.

The following figures from Tables 32 and 33 (pages 124 and 125) show the distribution of summer courses among the several subject groups:

	1912	1913
Art and design	2	2
Language and literature (Latin, French, German, English)	33	36
Political and social sciences (history, economics, political science, sociology)	12	17
Education and psychology	11	18
Mathematics	9	10
Physical sciences (physics, chemistry, physiography)	29	35
Biological sciences (zoology, botany, entomology)	10	13
Engineering subjects (general engineering drawing, manual training, mechanical engineering, mechanics)	12	12
Agriculture	5	8
Household science	.....	5
Music	5	3
Library science	6	7
Physical training	5	1
Totals	139	167

Business management, *see* occupations

Calhoun county
California
degrees, 96, 102
students from, 33, 41, 44, 48, 52, 59, 61, 66, 68
Canada
degrees, 92, 96, 102
students from, 34, 46, 54
Carroll county
degrees, 95
students from, 41, 48
Cass county
degrees, 95, 100
students from, 41, 48
C.B. degrees held by students, 37, 71, 74
C.E. degrees held by students, 37, 71, 74
Central America, students from, 46
Ceramic engineering, enrollment, 8, 14, 16, 18
Ceramics
enrollment, 8, 14, 16, 18
courses offered, 118, 121, 123
Champaign county
degrees, 92, 95, 100
students from, 33, 41, 48
Chemical engineering course, enrollment, 8, 14, 16, 18
Chemistry
courses offered, 117, 118, 119, 120, 122, 124, 125
enrollment, 8, 14, 16, 18
faculty, 105, 106, 107, 112, 114
women in, 9
China
degrees, 92, 96, 102
students from, 34, 46, 54, 62, 70
Christian county
degrees, 92, 95, 100
students from, 41, 48
Civil engineering
courses offered, 121, 123
enrollment, 14, 16, 18
faculty, 106, 112, 114
Clark county
degrees, 95, 100
students from, 41, 48

Classes
ages of students by, 86, 88
comparative enrollment, 19
Classes and courses, enrollment by, 14, 16
Classics
courses offered, 118, 119, 120, 122, 124, 125
faculty, 112, 114
Clay county
degrees, 100
students from, 41, 48
Clinton county
degrees, 100
students from, 41, 48
Coles county
degrees, 100
students from, 41, 48
Colleges
enrollment by, 11, 12, 13
enrollment, 1890-1913, 26, 32
Colleges and Universities
Illinois, intrants from, 35, 59, 66
foreign countries, intrants from, 36, 61, 62, 70
other states, intrants from, 36, 61, 68
Colorado
degrees, 96, 102
students from, 44, 52, 59, 61, 66, 69
Comparative enrollment
by classes, 19
by courses, 18
Composition of student body (Part Two), 33, 90
Composition of undergraduate colleges, 121
Connecticut, students from, 44, 52, 69
Contents, table of, 5
Cook county
degrees, 92, 95, 100
students from, 33, 41, 48
Costa Rica, students from, 46
Counties in Illinois
degrees, 95, 100
students from, 33, 41, 43, 48, 51
Courses, comparative enrollment, 8, 18
Courses and classes, enrollment by, 14, 16
Courses offered, (Part Five) 117, 125.
Crawford county
degrees, 95, 100
students from, 41 48
Cuba
degrees, 92, 96, 102
students from, 46, 54
Cumberland county
degrees, 100
students from, 41, 48
Cunningham, H. E., 3

Dairy Husbandry
courses offered, 121, 123
faculty, 106, 112, 114
Degrees, enumeration, 91
summary, 91, 93, 94
geographical distribution, 92, 95, 100

Denmark, students from, 54
Dentistry, College of
degrees, 91, 93
enrollment, 7, 11, 12, 14, 20
1901-1913, 29-31
faculty, 105, 110
organization, 10
women in, 9
Detailed statement of enrollment, 14, 16
DeWitt county
degrees, 95, 100
students from, 41, 48
District of Columbia, students from, 44, 52, 59, 61, 66, 69
Doctors' degrees held by students, 37
Douglas county
degrees, 100
students from, 41, 48
Drawing, General engineering
courses offered, 119, 121, 123, 124, 125
faculty, 112, 114
DuPage county
degrees, 95, 100
students from, 41, 48

Economics
courses offered, 118, 119, 120, 122, 124, 125
faculty, 106, 112, 114
Edgar county
degrees, 92, 95, 100
students from, 33, 41, 48
Education
courses offered, 118, 119, 120, 122, 124, 125
faculty, 112, 114
Edwards county
degrees, 95
students from, 41, 48
E.E. degrees
conferred, 93, 94
held by students, 37, 71, 74
Effingham county, students from, 41, 48
Egypt, students from, 46
Electrical engineering
enrollment, 14, 16, 18
courses offered, 121, 123
faculty of, 106, 112, 114
Engineering, College of
ages of students, 86
courses offered, 118, 119, 121, 123, 124, 125
degrees, 92, 93, 94
enrollment, 7, 8, 11, 12, 13, 14, 15, 16, 18, 19, 21
1890-1913, 26, 28, 30, 32

courses offered, 118, 119, 121, 123, 124, 125
faculty, 112, 114
Europe, students from, 46, 54

Faculty, (Part Four), 105-116
Fayette county
degrees, 95
students from, 41, 48
Financial and semi-legal business, *see* occupations
Floriculture, courses offered, 121, 123
Florida, students from, 44, 52
Ford county
degrees, 95, 100
students from, 41, 48
Foreign countries
degrees, 92
intrants from, 56, 62, 63, 70
students from, 34, 41, 46, 48, 54
Franklin county, students from, 41, 48
French, courses offered, 119, 120, 122, 124, 125
(*see also* Romance languages)
Freshman class
ages of students, 87
enrollment, 15, 17, 19
Fulton county
degrees, 95, 100
students from, 33, 41, 48

Gain or loss of students by colleges, 7
Gallatin county, students from, 41, 49
Geographical distribution
degrees, 92, 95, 100
students, 33, 34, 41, 48
Geology
courses offered, 118, 120, 122
faculty, 112, 114
Georgia
degrees, 102
students from, 44, 52
Germanic languages
courses offered, 118, 119, 120, 122, 124, 125
faculty, 106, 107, 112, 114
Germany, students from, 46, 54, 64
Government service, *see* occupations
Graduates, college or university, enrollment of, 36, 71, 74
Graduate School
ages of students, 86
enrollment, 7, 11, 12, 13, 14, 16, 20
1890-1913, 26, 28, 30, 32
organization, 10
parentage of degrees, 36, 71, 74
Great Britain, students from, 46, 54
Greece, students from, 46, 54
Greene county
degrees, 95, 100
students from, 41, 49
Greek, courses offered, 120, 122 (*see also* Classics)
Growth, 1868-1913, 10, 24, 25, 26
Grundy county
degrees, 95, 100
students from, 41, 49

Hamilton county, students from, 33, 41, 49
Hancock county
degrees, 92, 95, 100
students from, 41, 49
Hardin county, students from, 33, 41, 49
Hawaii, students from, 46, 54
Henderson county
degrees, 100
students from, 41, 49
Henry county
degrees, 95, 100
students from, 41, 49
High schools, accredited
Illinois, 56, 63
intrants from, 35, 56, 63
in other states, intrants from, 36, 59, 66
History
courses offered, 118, 119, 120, 122, 124, 125
faculty, 106, 107, 112, 114
Holland, students from, 46, 54
Honorary degrees, 91, 93
Horticulture
courses offered, 121, 123
faculty, 105, 106, 112, 114
Household science
courses offered, 119, 121, 123, 124, 125
enrollment, 8, 14, 16, 18
1890-1905, 26, 28
faculty, 106, 107, 112, 114

Idaho
degrees, 102
students from, 44, 52, 66, 69
Illinois
accredited high schools, 35, 56, 63
proportion of students from, 33, 41, 43, 48, 51
students from, 41, 48
Increase in enrollment, 1868-1913, 10, 24, 25, 26
India
degrees, 92, 96, 102
students from, 34, 46, 54, 62, 70
Indiana
degrees, 92, 96, 102
students from, 34, 44, 52, 59, 61, 66, 68, 69
Insular Possessions
degrees, 92
students from, 34, 41, 46, 48, 54
Intrants, scholastic distribution of, 34, 56, 63
Iowa
degrees, 92, 96, 102
students from, 34, 44, 52, 60, 61, 67, 69
Iroquois county
degrees, 92, 95, 100
students from, 33, 41, 49
Italian, courses offered, 120, 122
(*see also* Romance languages)
Italy
degrees, 92, 102
students from, 46, 54

Jackson county
degrees, 95, 100
students from, 41, 49
James, President Edmund J., 3, 107
Japan
degrees, 92, 96, 102
students from, 34, 46, 54, 62, 70
Jasper county
degrees, 95
students from, 41, 49
J. D. degrees
conferred, 93, 94
held by students, 37, 71, 74
Jefferson county, students from, 41, 49
Jersey county
degrees, 95
students from, 41, 49
Jo Daviess county
degrees, 95, 100
students from, 41, 49
Johnson county, students from, 41, 49
Junior class
ages of students, 86
enrollment, 14, 16, 19

Kane county
degrees, 92, 95, 100
students from, 33, 41, 49
Kankakee county
degrees, 95, 100
students from, 41, 49
Kansas
degrees, 96, 102
students from, 44, 52, 60, 61, 67, 68,
Kendall county
degrees, 100
students from, 41, 49
Kentucky
degrees, 96, 102
students from, 44, 52, 60, 67, 68, 69
Knox county
degrees, 92, 95, 100
students from, 41, 49
Korea, students from, 46

Lake county
degrees, 95, 100
students from, 42, 49
Landscape gardening, courses offered, 121, 123
Languages and literature, courses offered, 118, 119, 120, 122, 124, 125
La Salle county
degrees, 92, 95, 100
students from, 33, 42, 49
Latin, courses offered, 119, 120, 122, 124, 125
(*see also* Classics)
Law, College of
ages of students, 86
courses offered, 121, 123
degrees in, 92, 93, 94
enrollment, 7, 11, 12, 13, 14, 16, 20, 21
1897-1913, 26, 28, 30, 32
faculty, 105, 110
occupation of students' parents, 78
